

SUMMARY	Quantitative researcher building human data collection, AI evaluation, and AI-assisted research pipelines for generative AI products. Ph.D. from Harvard; experience spanning large-scale experiments, LLM data labeling, and survey infrastructure at Meta and a startup I co-founded.
EXPERIENCE	Quantitative UX Researcher, Meta, Menlo Park, CA2025–Present <i>GenAI/Automation and Monetization teams</i> • Ran advertiser and end-user studies on generative AI features in Meta Ads, designing and overseeing the data collection behind them; produced the evidence base that shaped how automated campaign tools were designed and rolled out. • Built an AI-supported research pipeline that takes hypotheses to product decisions in days rather than weeks. • Built AI evaluation tooling to assess data collection quality. • Ran experiments to guide high-stakes investment decisions, managing external vendors end to end. Co-founder, Galata Survey Research, Istanbul, Turkey2023–2025 • Built and led engineering and research teams developing a data labeling system and annotator workforce for fine-tuning LLMs. • Built a survey platform and participant pool; designed experimental and randomization strategies that improved data reliability and audience targeting. • Built consent, data handling, and privacy infrastructure, separating respondent identity from survey content; reviewing party on IRB Letters of Agreement for academic partners. Survey Consultant, Internews, UK2021–2023 • Designed sampling and questionnaire protocols, setting data quality and respondent protection standards across partner media outlets. • Ran surveys and focus groups with media audiences to inform product strategy and engagement.
EDUCATION	Ph.D., Political Economy and Government, Harvard University • Designed and ran large-scale panel experiments on intergroup dynamics and misinformation on digital platforms. Funded by \$168K+ in grants incl. MIT J-PAL, Harvard Weatherhead Center, IQSS. • TA for Randomized Controlled Trial Design, Data, and Survey Research Methods. M.A., Political Science, Boston University B.A., Economics and Political Science (double major), Bogazici University
SELECTED PUBLICATIONS	Language-Agnostic Bias Detection in Language Models with Bias Probing. <i>EMNLP</i> (with Köksal, Yalcin, Kilavuz, Korhonen, Schütze). Social Media Narratives across Platforms in Conflict: Evidence from Syria. <i>Journal of Politics</i> (with Walk, Parker-Magyar, Garimella, Christia). Aiding Harmony: How International Aid Shapes Local Policy Preferences and Behavior toward Refugees (with Cammett). <i>Preprint</i>. How Does Exposure to Discordant Media Sources Affect Political Attitudes and Behavior? (with Bowles, Larreguy, Lui). <i>Preprint</i>.
SKILLS	<i>Methods</i>: human data collection & quality, AI evaluation, experiments, randomized controlled trials (RCTs), survey design, AI-moderated interviews, causal inference <i>Tools</i>: Python, R, SQL, Qualtrics, L^AT_EX
